技术规格

Background:	This gene encodes a nonreceptor tyrosine-kinase of the src family of proto-oncogenes that are typically involved in cell proliferation and differentiation. The protein has a role in B-cell receptor signaling and B-cell development. The protein also stimulates insulin synthesis and secretion in response to glucose and enhances the expression of several pancreatic beta-cell transcription factors.
Applications:	IHC
Name of antibody:	BLK(Phospho-Tyr501)
Immunogen:	Peptide sequence around phosphorylation site of tyrosine 501 (R-Q-Y(p)-E-L) derived from Human BLK.
Full name:	BLK proto-oncogene, Src family tyrosine kinase

Synonyms :	MODY11
SwissProt:	P51451
IHC positive control:	Human breast carcinoma tissue
IHC Recommend dilution:	50-100
