

RNF128 抗原（重组蛋白）

中文名称： RNF128 抗原（重组蛋白）

英文名称： RNF128 Antigen (Recombinant Protein)

别名： ring finger protein 128; GRAIL

储存： 冷冻（-20℃）

相关类别： 抗原

概述

Fusion protein corresponding to a region derived from 39-207 amino acids of human RNF128

技术规格

Full name:	ring finger protein 128
Synonyms:	GRAIL
Swissprot:	Q8TEB7
Gene Accession:	BC063404
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The protein encoded by this gene is a type I transmembrane protein that localizes to the endocytic pathway. This protein contains a RING zinc-finger motif and has been shown to possess E3 ubiquitin ligase activity. Expression of this gene in retrovirally transduced T cell hybridoma significantly inhibits activation-induced IL2 and IL4 cytokine production. Induced expression of this gene was observed in anergic CD4(+) T cells, which suggested a role in the indu

ction of anergic phenotype. Alternatively spliced transcript variants encoding distinct isoforms have been reported.
