

兔抗 CCR9 多克隆抗体

中文名称：兔抗 CCR9 多克隆抗体

英文名称： Anti-CCR9 rabbit polyclonal antibody

别名： GPR28; CDw199; GPR-9-6; CC-CKR-9

相关类别： 一抗

抗原： CCR9

储存： 冷冻（-20℃）

宿主： Rabbit

反应种属： Human, Mouse

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the beta chemokine receptor family. It is predicted to be a seven transmembrane protein similar to G protein-coupled receptors. Chemokines and their receptors are key regulators of the thymocytes migration and maturation in normal and inflammation conditions. The specific ligand of this receptor is CCL 25. It has been found that this gene is differentially expressed by T lymphocytes of small intestine and colon, suggested a role in the thymocytes recruitment and development that may permit functional specialization of immune responses in different segment of the gastrointestinal tract. This gene is mapped

	d to the chemokine receptor gene cluster region.
Applications:	ELISA, IHC
Name of antibody:	CCR9
Immunogen:	Fusion protein of human CCR9
Full name:	chemokine (C-C motif) receptor 9
Synonyms :	GPR28; CDw199; GPR-9-6; CC-CKR-9
SwissProt:	P51686
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human esophagus cancer and human thyroid cancer
IHC Recommend dilution:	50-200
