

兔抗 CDKN2AIP 多克隆抗体

中文名称：兔抗 CDKN2AIP 多克隆抗体

英文名称： Anti-CDKN2AIP rabbit polyclonal antibody

别名： CARF

抗原： CDKN2AIP

储存： 冷冻（-20℃）

宿主： Rabbit

相关类别： 一抗

反应种属： Human

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

CDKN2AIP (CDKN2A-interacting protein), also known as CARF, is a 580 amino acid protein that activates p53 via p14 ARF (alternate reading frame)-dependent and independent pathways. CDKN2AIP-dependent activation of p53, a protein that up-regulates growth arrest and apoptosis-related genes in response to stress signals, leads to an enhancement of p53 function. Expression levels of CDKN2AIP and p53 show an inverse relationship that is caused by a negative-feedback control via a proteasome-mediated degradation pathway. CDKN2AIP is expressed ubiquitously across tissue samples and, along with p14 ARF, is localized to the perinucleolar region within the nucleus.

Applications:	ELISA, IHC
Name of antibody:	CDKN2AIP
Immunogen:	Fusion protein of human CDKN2AIP
Full name:	CDKN2A interacting protein
Synonyms :	CARF
SwissProt:	Q9NXV6
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	50-200
