

兔抗 GHRH 多克隆抗体

中文名称：兔抗 GHRH 多克隆抗体

英文名称：Anti-GHRH rabbit polyclonal antibody

别名：GRF; INN; GHRF

抗原：GHRH

相关类别：一抗

储存：冷冻 (-20℃)

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes a member of the glucagon family of proteins. The encoded preproprotein is produced in the hypothalamus and cleaved to generate the mature factor, known as somatoliberin, which acts to stimulate growth hormone release from the pituitary gland. Variant receptors for somatoliberin have been found in several types of tumors, and antagonists of these receptors can inhibit the growth of the tumors. Defects in this gene are a cause of dwarfism, while hypersecretion of the encoded protein is a cause of gigantism. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed.
Applications:	ELISA, IHC
Name of antibody:	GHRH

Immunogen:	Synthetic peptide corresponding to a region derived from 59-72 amino acids of human GHRH
Full name:	growth hormone releasing hormone
Synonyms:	GRF; INN; GHRF
SwissProt:	P01286
ELISA Recommended dilution:	1000-2000
IHC Positive control:	Human gastric cancer;
IHC Recommended dilution:	20-100
