技术规格

Background:	Transient receptor potential ion channels (TRPC) are a superfamily of six transmembrane segment-spanning gated cation channels. TRP subtypes mediate store-operated Ca ²⁺ entry, a process involving Ca ²⁺ influx and replenishment of Ca ²⁺ stores formerly emptied through the action of inositol 1,4,5-trisphosphate production and other Ca ²⁺ mobilizing agents.
Applications:	ELISA, IHC
Name of antibody:	TRPM8
Immunogen:	Fusion protein of human TRPM8
Full name:	transient receptor potential cation channel, subfamily M, member 8
Synonyms :	TRPP8; LTRPC6
SwissProt:	Q7Z2W7

ELISA Recommended dilution:	1000-2000
IHC positive control:	Human esophagus cancer
IHC Recommend dilution:	25-100
