

兔抗 LEP 多克隆抗体

- 中文名称：兔抗 LEP 多克隆抗体
- 英文名称：Anti-LEP rabbit polyclonal antibody
- 别名：OB; OBS; LEPD
- 相关类别：一抗
- 抗原：LEP
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 反应种属：Human
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes a protein that is secreted by white adipocytes, and which plays a major role in the regulation of body weight. This protein, which acts through the leptin receptor, functions as part of a signaling pathway that can inhibit food intake and/or regulate energy expenditure to maintain constancy of the adipose mass. This protein also has several endocrine functions, and is involved in the regulation of immune and inflammatory responses, hematopoiesis, angiogenesis and wound healing. Mutations in this gene and/or its regulatory regions cause severe obesity, and morbid obesity with hypogonadism. This gene has also been linked to type 2 diabetes mellitus development.
Applications:	ELISA, IHC
Name of antibody:	LEP

Immunogen:	Full length fusion protein
Full name:	leptin
Synonyms :	OB; OBS; LEPD
SwissProt:	P41159
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	30-150
