

兔抗 LIFR 多克隆抗体

中文名称：兔抗 LIFR 多克隆抗体

英文名称：Anti-LIFR rabbit polyclonal antibody

别名：SWS, SJS2, STWS, CD118, LIF-R

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：LIFR

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a protein that belongs to the type I cytokine receptor family. This protein combines with a high-affinity converter subunit, gp130, to form a receptor complex that mediates the action of the leukemia inhibitory factor, a polyfunctional cytokine that is involved in cellular differentiation, proliferation and survival in the adult and the embryo. Mutations in this gene cause Schwartz-Jampel syndrome type 2, a disease belonging to the group of the bent-bone dysplasias. A translocation that involves the promoter of this gene, t(5;8)(p13;q12) with the pleiomorphic adenoma gene 1, is associated with salivary gland pleiomorphic adenoma, a common type of benign epithelial tumor of the salivary gland. Multiple splice variants encoding the same protein have been found for this gene.

Applications:	ELISA, IHC
Name of antibody:	LIFR
Immunogen:	Synthetic peptide of human LIFR
Full name:	leukemia inhibitory factor receptor alpha
Synonyms :	SWS, SJS2, STWS, CD118, LIF-R
SwissProt:	P42702
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human colon cancer and Human ovarian cancer
IHC Recommend dilution:	25-100
