

兔抗 LTA 多克隆抗体

中文名称：兔抗 LTA 多克隆抗体

英文名称：Anti-LTA rabbit polyclonal antibody

别名：LT; TNFB; TNFSF1

抗原：LTA

储存：冷冻（-20℃）

宿主：Rabbit

相关类别：一抗

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The encoded protein, a member of the tumor necrosis factor family, is a cytokine produced by lymphocytes. The protein is highly inducible, secreted, and forms heterotrimers with lymphotoxin-beta which anchor lymphotoxin-alpha to the cell surface. This protein also mediates a large variety of inflammatory, immunostimulatory, and antiviral responses, is involved in the formation of secondary lymphoid organs during development and plays a role in apoptosis. Genetic variations in this gene are associated with susceptibility to leprosy type 4, myocardial infarction, non-Hodgkin's lymphoma, and psoriatic arthritis. Alternatively spliced transcript variants have been observed for this gene.

Applications:	ELISA, IHC
Name of antibody:	LTA
Immunogen:	Fusion protein of human LTA
Full name:	lymphotoxin alpha (TNF superfamily, member 1)
Synonyms :	LT; TNFB; TNFSF1
SwissProt:	P01374
ELISA Recommended dilution:	2000-10000
IHC positive control:	Human colon cancer and Human lung cancer
IHC Recommend dilution:	50-200
