

## HRP 标记的山羊抗豚鼠 IgG

- 中文名称: HRP标记的山羊抗豚鼠 IgG
- 英文名称: HRP-conjugated Goat anti-Guinea pig IgG
- 相关类别: HRP标记二抗
- 储 存: 冷冻 (-20℃)
- 标 记 物: HRP

## 技术规格

Background	Immunoglobulin G (IgG), is one of the most abundant proteins in serum with normal levels between 9.5-12.5 mg/ml in adult bl ood. IgG is important for our defense against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule has two sepa rate functions; to bind to the pathogen that elicited the response and to recruit other cells and molecules to destroy the antig en. The variability of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 1011 variants.
Applications	1/1000-5000 for ELISA 1/1000-5000 for Western blotting 1/200- 500 for Immunohistochemistry/cytochemistry
