

CADM3 抗原（重组蛋白）

中文名称： CADM3 抗原（重组蛋白）

英文名称： CADM3 Antigen (Recombinant Protein)

别名： B1gR; NECL1; TSLL1; IGSF4B; Necl-1; synCAM3

储存： 冷冻（-20℃）

相关类别： 抗原

概述：

Fusion protein corresponding to C terminal 250 amino acids of human CADM3

技术规格：

Full name:	cell adhesion molecule 3
Synonyms:	B1gR; NECL1; TSLL1; IGSF4B; Necl-1; synCAM3
Swissprot:	Q8N126
Gene Accession:	BC033819
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Cell adhesion molecule 3 is a protein that in humans is encoded by the CADM3 gene. IGSF4B is a brain-specific protein related to the calcium-independent cell-cell adhesion molecules known as nectins. Involved in the cell-cell adhesion. Has both calcium-independent homophilic cell-cell adhesion activity and calcium-independent heterophilic cell-cell adhesion activity with IGSF4, PVRL1 and PVRL3. Interaction with EPB41L1 may regulate structure or function of cell-cell junctions.
