

## MEP1A 抗原（重组蛋白）

中文名称： MEP1A 抗原（重组蛋白）

英文名称： MEP1A Antigen (Recombinant Protein)

别名： meprin A, alpha (PABA peptide hydrolase); PPHA

储存： 冷冻（-20℃）

相关类别： 抗原

### 概述

Fusion protein corresponding to a region derived from 264-433 amino acids of human MEP1A

### 技术规格

<b>Full name:</b>	meprin A, alpha (PABA peptide hydrolase)
<b>Synonyms:</b>	PPHA
<b>Swissprot:</b>	Q16819
<b>Gene Accession:</b>	BC131714
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SDS-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	Meprin A subunit alpha also known as endopeptidase-2 or PABA peptide hydrolase is the alpha subunit of the meprin A enzyme that in humans is encoded by the MEP1A gene.[1][2]The MEP1A locus is on chromosome 6p in humans and on chromosome 17 in mice. The meprin alpha subunit product of the MEP1A gene is processed in the endoplasmic reticulum during intracellular transport, and is secreted as homomeric meprin A.
