

ProteinA 免疫磁珠

中文名称: Protein A 免疫磁珠

英文名称: Protein A magnetic beads

相关类别: 抗体相关支持试剂

储 存: 冷藏 (2-8℃) 不可冻存

概述

The Protein A magnetic beads, conjugated with protein A, are used for purification of many species of IgG (Antibody) , especially for Human IgG, IgG1, IgG2, IgG4, Rabbit IgG, Mouse IgG2a, Cat IgG, Goat IgG2, Sheep IgG2, Cow IgG2, Pig IgG, and so on. For purification, the antibody is added to a tube containing Protein A purified beads. The tube is then placed on a Magnetic separation device, where the beads migrate to the side wall of the tube facing the Magnetic separation device and allow for easy removal of the supernatant. The bound antibodies are dissociated from the beads using an Elution Buffer.

应用

IP; Purification

技术规格

Diameter	φ0.5 μm
Concentration	0.4 mg protein/ml, 50mg beads/ml
