

WNT9A 抗原（重组蛋白）

中文名称：WNT9A 抗原（重组蛋白）

英文名称：WNT9A Antigen (Recombinant Protein)

别名：Wnt family member 9A; WNT14

储存：冷冻（-20℃）

相关类别：抗原

概述：

Fusion protein corresponding to a region derived from 93-365 amino acids of human WNT9A

技术规格：

Full name:	Wnt family member 9A
Synonyms:	WNT14
Swissprot:	O14904
Gene Accession:	BC113431
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The WNT gene family consists of structurally related genes that encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. This gene is a member of the WNT gene family. It is expressed in gastric cancer cell lines. The protein encoded by this gene shows 75% amino acid identity to chicken Wnt14, which has been shown to play a central role in initiating synovial joint formation in the chick limb. This gene is clustered with another family member, WNT3A, in the c

hromosome 1q42 region.
