技术规格

Background:	The protein encoded by this gene belongs to the eukaryotic diacylglycerol kinase family. It may attenuate protein kinase C activity by regulating diacylglycerol levels in intracellular signaling cascade and signal transduction. Alternative splicing occurs at this locus and multiple transcript variants encoding distinct isoforms have been identified.
Applications:	ELISA, IHC
Name of antibody:	DGKZ
Immunogen:	Synthetic peptide of human DGKZ
Full name:	diacylglycerol kinase, zeta
Synonyms :	DAGK5; DAGK6; DGK-ZETA; hDGKzeta
SwissProt:	Q13574

ELISA Recommended dilution:	1000-5000
IHC positive control:	Human cervical cancer and Human colon cancer
IHC Recommend dilution:	50-200
