

## 兔抗 E2F4 多克隆抗体

中文名称：兔抗 E2F4 多克隆抗体

英文名称：Anti-E2F4 rabbit polyclonal antibody

别名：E2F-4

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：E2F4

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

### 技术规格

**Background:**

The protein encoded by this gene is a member of the E2F family of transcription factors. The E2F family play a crucial role in the control of cell cycle and action of tumor suppressor proteins and is also a target of the transforming proteins of small DNA tumor viruses. The E2F proteins contain several evolutionally conserved domains found in most members of the family. These domains include a DNA binding domain, a dimerization domain which determines interaction with the differentiation regulated transcription factor proteins (DP), a transactivation domain enriched in acidic amino acids, and a tumor suppressor protein association domain which is embedded within the transactivation do

	main. This protein binds to all three of the tumor suppressor proteins pRB, p107 and p130, but with higher affinity to the last two.
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	E2F4
<b>Immunogen:</b>	Synthetic peptide of human E2F4
<b>Full name:</b>	E2F transcription factor 4, p107/p130-binding
<b>Synonyms :</b>	E2F-4
<b>SwissProt:</b>	Q16254
<b>ELISA Recommended dilution:</b>	2000-5000
<b>IHC positive control:</b>	Human thyroid cancer and Human liver cancer
<b>IHC Recommend dilution:</b>	50-200
