技术规格

Background:	This gene was identified as a retinoid acid (RA) receptor-responsive gene. It encodes a type 1 membrane protein. The expression of this gene is upregulated by tazarotene as well as by retinoic acid receptors. The expression of this gene is found to be downregulated in prostate cancer, which is caused by the methylation of its promoter and CpG island. Alternatively spliced transcript variant encoding distinct isoforms have been observed.
Applications:	ELISA, IHC
Name of antibody:	RARRES1
Immunogen:	Synthetic peptide of human RARRES1
Full name:	Retinoic acid receptor responder (tazarotene induced) 1

SwissProt:	P49788
ELISA Recommended dilution:	5000-20000
IHC positive control:	Human cervical cancer and Human colon cancer
IHC Recommend dilution:	100-300
