

兔抗 FAM107A 多克隆抗体

中文名称：兔抗 FAM107A 多克隆抗体

英文名称：Anti-FAM107A rabbit polyclonal antibody

别名：DRR1; TU3A

相关类别：一抗

抗原：FAM107A

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

FAM107B is a 131 amino acid protein that is encoded by a gene that maps to human chromosome 10, which contains over 800 genes and 135 million nucleotides, making up nearly 4.5% of the human genome. PTEN is an important tumor suppressor gene located on chromosome 10 and, when defective, causes a genetic predisposition to cancer development known as Cowden syndrome. The chromosome 10 encoded gene ERCC6 is important for DNA repair and is linked to Cockayne syndrome which is characterized by extreme photosensitivity and premature aging. Tetrahydrobiopterin deficiency and a number of syndromes involving defective skull and facial bo

	ne fusion are also linked to chromosome 10. As with most trisomies, trisomy 10 is rare and is deleterious.
Applications:	ELISA, IHC
Name of antibody:	FAM107A
Immunogen:	Fusion protein of human FAM107A
Full name:	family with sequence similarity 107, member A
Synonyms :	DRR1; TU3A
SwissProt:	O95990
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human liver cancer and human colon cancer
IHC Recommend dilution:	50-200
