

兔抗 ZNHIT1 多克隆抗体

中文名称：兔抗 ZNHIT1 多克隆抗体

英文名称：Anti-ZNHIT1 rabbit polyclonal antibody

别名：CG1I; ZNFN4A1

储存：冷冻（-20℃）

抗原：ZNHIT1

宿主：Rabbit

相关类别：一抗

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

ZNHIT1 (zinc finger, HIT-type containing 1), also known as CG1I (cyclin-G1-binding protein 1), p18 hamlet or ZNF N4A1 (zinc finger protein subfamily 4A member 1), is a 154 amino acid protein that plays a role in the induction of p53-mediated apoptosis. A member of the ZNHIT1 family, ZNHIT1 contains one HIT-type zinc finger and interacts with p38. ZNHIT1 undergoes post-translational phosphorylation and is encoded by a gene that maps to human chromosome 7, which houses over 1,000 genes and comprises nearly 5% of the human genome. Chromosome 7 has been linked to Osteogenesis imperfecta, Pendred syndrome, Lissencephaly, Citrullinemia and Shwachman-Diamond syndrome. The deletion of a portion of the q arm of chromosome 7 is associated with Williams-Beuren syndrome, a condition characterized by mild mental retardation.

	ation, an unusual comfort and friendliness with strangers and an elfin appearance.
Applications:	ELISA, IHC
Name of antibody:	ZNHIT1
Immunogen:	Full length fusion protein
Full name:	zinc finger HIT-type containing 1
Synonyms:	CG1I; ZNFN4A1
SwissProt:	O43257
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer and human esophagus cancer
IHC Recommend dilution:	25-100
