技术规格

Background:	This gene is a member of the NGF-beta family and encodes a secreted protein which homodimerizes and is incorporated into a larger complex. This protein has nerve growth stimulating activity and the complex is involved in the regulation of growth and the differentiation of sympathetic and certain sensory neurons. Mutations in this gene have been associated with hereditary sensory and autonomic neuropathy, type 5 (HSAN5), and dysregulation of this gene's expression is associated with allergic rhinitis.
Applications:	ELISA, IHC
Name of antibody:	NGF
Immunogen:	Fusion protein of human NGF
Full name:	nerve growth factor (beta polypeptide)
Synonyms :	NGFB; HSAN5; Beta-NGF

SwissProt:	P01138
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	50-200
