技术规格

Background:	Polyspecific organic cation transporters in the liver, kidney, intestine, and other organs are critical for elimination of many endogenous small organic cations as well as a wide array of drugs and environmental toxins. This gene is one of three similar cation transporter genes located in a cluster on chromosome 6. The encoded protein contains twelve putative transmembrane domains and is a plasma integral membrane protein.
Applications:	ELISA, WB, IHC
Name of antibody:	SLC22A3
Immunogen:	Synthetic peptide of human SLC22A3
Full name:	Solute carrier family 22 (extraneuronal monoamine transporter), member 3
