

兔抗 CHGA 多克隆抗体

中文名称：兔抗 CHGA 多克隆抗体

英文名称：Anti-CHGA rabbit polyclonal antibody

别名：CGA

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：CHGA

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	The protein encoded by this gene is a member of the chromogranin/secretogranin family of neuroendocrine secretory proteins. It is found in secretory vesicles of neurons and endocrine cells. This gene product is a precursor to three biologically active peptides; vasostatin, pancreastatin, and parastatin. These peptides act as autocrine or paracrine negative modulators of the neuroendocrine system. Two other peptides, catestatin and chromofungin, have antimicrobial activity and antifungal activity, respectively. Two transcript variants encoding different isoforms have been found for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	CHGA
Immunogen:	Synthetic peptide of human CHGA

Full name:	chromogranin A (parathyroid secretory protein 1)
Synonyms :	CGA
SwissProt:	P10645
ELISA Recommended dilution:	1000-2000
IHC positive control:	Human thyroid cancer and Human esophagus cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	51 kDa
WB Positive control:	A549 cells
WB Recommended dilution:	200-1000
