技术规格

Background:	Specificity of vesicular transport is regulated, in part, by the interaction of a vesicle-associated membrane protein termed synaptobrevin/VAMP with a target compartment membrane protein termed syntaxin. These proteins, together with SNAP25 (synaptosome-associated protein of 25 kDa), form a complex which serves as a binding site for the general membrane fusion machinery.
Applications:	ELISA, WB, IHC
Name of antibody:	SNAP23
Immunogen:	Full length fusion protein

Full name:	synaptosomal-associated protein, 23kDa
Synonyms:	SNAP-23; SNAP23A; SNAP23B; HsT17016
SwissProt:	O00161
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human prostate cancer and human breast cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	23 kDa
WB Positive control:	Human placenta tissue and hela cells, hepg2 cells and human fetal liver tissue, A549 cells and human normal kidney tissue
WB Recommended dilution:	500-2000
