

兔抗 ASXL1 多克隆抗体

中文名称：兔抗 ASXL1 多克隆抗体

英文名称：Anti-ASXL1 rabbit polyclonal antibody

别名：additional sex combs like 1, transcriptional regulator; MDS; BOPS

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：ASXL1

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene is similar to the Drosophila additional sex combs gene, which encodes a chromatin-binding protein required for normal determination of segment identity in the developing embryo. The protein is a member of the Polycomb group of proteins, which are necessary for the maintenance of stable repression of homeotic and other loci. The protein is thought to disrupt chromatin in localized areas, enhancing transcription of certain genes while repressing the transcription of other genes. The protein encoded by this gene functions as a ligand-dependent co-activator for retinoic acid receptor or in cooperation with nuclear receptor coactivator 1. Mutations in this gene are associated with myelodysplastic syndromes and chronic myelomonocytic leukemia.

	Alternative splicing results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	ASXL1
Immunogen:	Synthetic peptide of human ASXL1
Full name:	additional sex combs like 1, transcriptional regulator
Synonyms:	MDS; BOPS
SwissProt:	Q8IXJ9
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human prostate cancer and human gastric cancer
IHC Recommend dilution:	25-100
